

AQUATOP® MAXFLOW®

DC 9W SLIM NANO WAVE MAKER PUMP

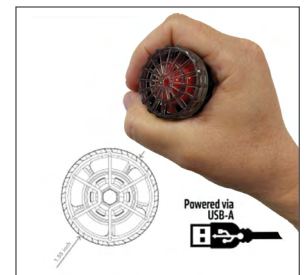

DC 12V WAVE MAKER PUMP WITH MAGNETIC MOUNT, IN-LINE
CONTROLLER, 3 WAVE MODES, AND 10 FLOW RATES.

Aquatop's MaxFlow DC 9W Slim Nano Wave Maker Pump is a powerful, highly efficient direct current wave making pump that moves and draws water in a unique way. The Prop-Style Impeller and 360° uniform water draw create a wider distribution of flow when compared to traditional powerheads. The Aquatop DC 9W Slim Nano Wave Maker Pump also includes a strong, secure magnet mounting system which allows for flexible placement. It runs quietly and efficiently, with 3 wave modes and 10 flow rates for precise control. This tiny pump is making big waves!

FEATURES:

- In-line controller with 3 different wave modes and 10 different flow rate settings
- 10-minute Feeding Pause setting
- Slim, quiet and Powerful
- Energy efficient DC motor made of alloy for long life
- Powerful Magnetic Mount
